Anticor/Ferrococor

Novel Anti-Corrosion Additives
and Metal Passivators

for tomorrow's

World

Anticor™/Ferrocor™

corrosion inhibitors & metal passivators

Anticor FA-N

Biodegradable additive.
Mainly protection of Fe-substrates. Good emulsifying properties.

Application:

Greases, metal working fluids; Oil based systems, semi synthetics, water free systems.

Anticor AMC 2330

Anti-corrosion additive for substrates: Aluminium; Copper; Magnesium.
Water emulsifiable and low foaming.

Application:

Metal working fluids for Aeronautic metal surfaces (Al/Mg based, only Anticor AMC 2330 in water).

Anticor F 1026

Ready biodegradable anti-corrosion additive for Fe-substrates.
High emulsifying properties. Recommended for ready biodegradable systems which require Blue Angle.

Application:

Greases, metal working fluids, ester based lubricants, oil based systems.

Anticor A 3N

Very effective aluminium anti-corrosion additive.
Good Fe-protective properties and high emulsifying properties.

Application:

Metal working fluids, cleaners.
Effective also in media pH >12.

Anticor P

Phosphorous-based corrosion inhibitor.
It acts as a multi metal corrosion inhibitor with emulsifying properties.

Very effective ferrous corrosion inhibitor.

Anticor A 5N

Non-foaming aluminium anti-corrosion additive.

Application:

Cleaners, metal working fluids.
Effective also in media with pH >12.

Anticor C 6N

Liquid, BTA and TTA free.
Metal passivator for use in both acidic and alkaline media.

Anticor A 40

Can be used in any water-based system that comes into contact with different grades of aluminium, copper/bronze and ferrous surfaces. Label free!

Ferrocor Flash

Flash-Rust inhibitor for aqueous systems.
Forms complexes with metal ions (Fe; Va; Bi; etc.). Good Aluminium protection.
